

TileVision AI

AI Visual Tile Search · Pricing Quote

FOR TILE SHOWROOMS &
MANUFACTURERS

Morbi

Find the right tile from a photo — in seconds.

Drop a WhatsApp image, phone photo, or crop. TileVision AI searches your catalogue visually and ranks the closest matches.

What TileVision AI does

- **Visual search** — Match tiles from customer photos, WhatsApp images, crops & room shots — not file names.
- **Your catalogue** — Indexes your own tile images (hundreds to thousands) into a private searchable AI index.
- **Best match first** — Shows ranked results with similarity % so staff can confirm the right SKU quickly.
- **Crop tools** — Auto Crop / Precise Crop / Manual Crop isolate the tile surface for better matches.
- **PDF catalogue** — Export selected matches as a professional PDF to share with the customer.
- **Works offline** — Desktop software for Windows & Mac — your catalogue stays on your computer.
